12 months staking bonus	6,000 PT
1 year total rewards	12,000 PT
2 years total rewards	24,000 PT

Projects and backgrounds

A B O U T

PERSEUS FINTECH S.A.

Perseus Fintech S.A. is an investment company listed on the Romanian Stock Exchange Market (BVB.ro) since 2012. At the beginning of 2022, the company started looking for investment opportunities into Cryptocurrencies and Blockchain based start-ups and projects, including NFTs.

Our goal is to attract 'traditional' investment funds and private investors into the Crypto space. The capital raised will be placed into strategic investments across different ranges of projects, currencies and NFTs, mainly based on Solana and on Ethereum blockchains. A third of all the profits generated using this capital will be shared through dividends with all the holders of Perseus Token.

Why Perseus?

1

PERSEUS FUNDING

We already raised 10.000.000€ of outside investment. We have commitments of 3.000.000€ for Perseus Token purchases. As a holder, you receive a percentage of all the profits we make using these outside investments. We bring money into Solana and directly into our holder's wallets.

2

TOKEN PROFIT FOR HOLDERS

Almost the entire Perseus Token supply is placed into circulation through the NFT mining. Each Perseus Token gives you a percentage of the Dividend Pool. Every time Perseus makes profit from an individual investment (e.g. an NFT, project or token), 30% of the profit goes into the Dividend Pool.

3

FOUNDERS TEAM BEHIND PERSEUS

The founder of Perseus Fintech S.A. is Federico Salmoiraghi, an experienced business man, who has been active on the Stock Exchange markets for over 10 years. He listed important companies on the Stock Exchange Market which were acquired by the biggest e-commerce giants in Eastern Europe. He also runs businesses with over 400 employees in multiple countries.

The technical team that handles the crypto part of Perseus Fintech S.A. consists of people that have been building multiple blockchain projects for over a year, and have a proven track record of strong development capabilities. They are fully doxxed from all past projects and current ones.

Private Sale

EARLY INVESTOR BENEFITS

PRICE

25 SOL
